NEW! SMP 60 BER

MORE FEED, MORE PRECISION - PATENTED PIPE PROCESSING THAT WORKS FAST, SAFE AND WITH MILLIMETER ACCURACY.

	β = 0°-80°		C up to 20 mm	on		with		d = 360 mm - 1.600 mm		t = 4 mm - 20 mm

NEW! Powerful feed in a compact design for maximum efficiency in production and on the construction site.

Integrated guide rollers ensure smooth guidance of the milling machine around the pipe contour during the machining process.

The robust clamping device allows easy mounting on the workpiece and simple handling throughout the entire milling process.

With its robust clamping technology and powerful feed, the SMP 60 BER is perfectly suited for flexible use in production and on construction site. It is easy to mount, simple to operate and equipped with variable speed for optimal cutting results on a wide variety of materials. A comprehensive range of milling heads in many geometries (V-J) and angles, as well as indexable inserts with various coatings, is available.
